

By 1999 BNP PARIBAS merger led to a project for integrating organisation and information system.

Every day, the new group exchanges more than 45 000 payments over € 800.000

Business Challenges

- ▶ Succeed in merging information system and enable cost reduction
- ▶ Implement a single platform for managing high-value payments and intraday liquidity throughout Europe

Our Solution

- ▶ Implementation of CRISTAL package from DIAMIS
- ▶ Integration and set-up of a fault tolerant platform delivering mission critical service
- ▶ Assistance during all project stages
- ▶ SLA commitment on operations support

The Results

- ▶ A tool to support conquest strategy on the Euro Zone
- ▶ An achieve project, taken as an example for internal communication about the merger.
