

The C.R.I. is the organisation that provides the central system dedicated to the exchanges of high value banking transfer in France. Composed of PNS (Paris Net Settlement - Real Time Net Settlement System in central bank money) and TBF (Transferts Banque de France - Real Time Gross Settlement System), it is known as RTGNS (Real Time Gross and Net Settlement).

Business Challenges

- ▶ C.R.I. was one of the very first Market Infrastructures to use SWIFT's FIN Copy service.
- ▶ Continue its tradition of being at the front of the industry with the migration to SWIFTNet.

Our Solution

- ▶ Consulting and advice through all phases of the project
- ▶ Technical architecture design
- ▶ Technical Migration :
 - ▶ Network - from X25 to IP
 - ▶ Database - from Informix to Oracle
 - ▶ Operating System - from HP to AIX
 - ▶ SWIFTAlliance

The Results

- ▶ Make the C.R.I. be one of the first Market Infrastructures to have migrated fully to SWIFTNet.
- ▶ By installing a SWIFT Alliance Gateway to front end their FIN interface, C.R.I. thought ahead to prepare for future use of SWIFTNet messaging services such as InterAct, FileAct and Browse.
